

Herbert Haigh Recognized

At the recent annual convention for the steel industry, the Metals Service Center Institute unveiled the President's Award for lifetime achievement. This award

"...recognizes metals service center industry executives whose long careers demonstrate the very best in business leadership, integrity, and community service. In his own way, each recipient has been responsible for decades of growth and professionalism in the service center industry."

Herbert Haigh was instrumental in the foundation of the trade association as well as providing the vision for our successful enterprise. This is a great recognition for our entire organization. I know our Chairman, Bob Haigh, was proud to step forward and receive this award in his grandfather's honor.
